Assignment 2

Signs with smart connectivity for Better road safety

PROBLEM STATEMENT:

Build a python code, assume u get temperature and humidity values (generated with random function to a variable) and write a condition to continuously detect alarm in case of high temperature.

```
importing the required modules
from tkinter import *
import datetime as dt
import time
import winsound as ws
# defining the function for the alarm clock
def alarm(setAlarmTimer):
  while True:
    time.sleep(1)
    actualTime = dt.datetime.now()
    currentTime = actualTime.strftime("%H : %M : %S")
    currentDate = actualTime.strftime("%d / %m / %Y")
    the_message = "Current Time: " + str(currentTime)
    print(the_message)
    if currentTime == setAlarmTimer:
       ws.PlaySound("sound.wav", ws.SND_ASYNC)
       break
def getAlarmTime():
  alarmSetTime = f"{hour.get()} : {minute.get()} : {second.get()}"
  alarm(alarmSetTime)
# creating the GUI for the application
guiWindow = Tk()
guiWindow.title("The Alarm Clock")
guiWindow.geometry("464x200")
guiWindow.config(bg = "#87BDD8")
guiWindow.resizable(width = False, height = False)
